Dear Mr. Name:

Are you receiving comprehensive environmental services for your properties?

ATC Environmental Inc. (ATC) provides consulting, testing, and management services to assist Property Managers in properly addressing environmental, health and safety requirements for all types of properties. ATC has worked closely with numerous property managers throughout New England and the U.S., and would enjoy the opportunity to compliment your team as well.

ATC is a full-service environmental consulting firm. We are organized into major divisions to better address our client's specific needs, including:

Industrial Hygiene/Indoor Air • Environmental Management • Litigation Support

Asbestos and Lead Risk Management • Analytical Laboratory • Environmental Training

Our staff of credentialed professionals, which includes Licensed Site Professionals, Registered Professional Engineers, and Certified Industrial Hygienists, is fully supported by our in-house laboratory, which is fully AIHA accredited for analysis of air, water and soils.

Thank you for taking the time to read this letter. An ATC representative will call you shortly to inquire how we may specifically address your needs. If you have any immediate concerns, feel free to call Paul Manna, our Boston Branch Manager, or myself, at 617-932-9400 regarding ATC's complete capabilities and qualifications, or to request a detailed information packet. We look forward to speaking with you.

Very truly yours,

ATC ENVIRONMENTAL, INC.

Patricia F. Clements
