Town, MA 00000

Dear Mr. Name:

ATC Environmental Inc. (ATC) provides consulting, testing, and management services to assist Architectural and Engineering firms in properly addressing environmental, health and safety requirements for all types of projects. ATC has worked closely with numerous A/E firms throughout New England and the U.S., and would enjoy the opportunity to compliment your project team as well.

ATC is a full-service environmental consulting firm. We are organized into major divisions to better address our client's specific needs, including:

Asbestos • Lead • Industrial Hygiene • Analytical Laboratory

Environmental Management • Environmental Training • Litigation Support

In addition, our staff of credentialed professionals, which includes Licensed Site Professionals, Registered Professional Engineers, and a Certified Industrial Hygienist, is fully supported by our in-house laboratory.

Our work with A/E firms has required thorough working knowledge of the intricacies associated with the A/E field, such as AIA documents and terminology, CSI and other specification formats, ROICC reports, CAD and other trade specifics. ATC's services are comprehensive, objective and cost-effective. We will compliment your team of A/E professionals by providing environmental expertise, credentialed staff, sound references, technical assistance and analytical services, as needed.

Thank you for taking the time to read this letter. An ATC representative will call you in the next week or so to see how we may specifically address your requirements. In the meantime, feel free to call me at 617-932-9400 to discuss ATC's complete capabilities and qualifications, or to request a detailed information packet. I look forward to speaking with you.

Very truly yours,
ATC ENVIRONMENTAL, INC.

Michael A. Diggin
Director of Business Development
